

NHS Office, Cunard Building

Brief

To automate the existing door at the Cheshire and Merseyside NHS Office in the Cunard Building, Liverpool to provide easy access for a disabled employee.

Solution

RB Architectural Hardware installed a Record DFA 127 Swing Door Operator, which not only automated the door, but could be programmed to open and close slowly, to ensure the employee could enter and exit the building safely.

Result

The Record DFA 127 was the ideal access solution for the Cheshire and Merseyside NHS Office, as it allowed them to automate the existing door to meet the requirements of the historic Grade II* listed Cunard building.

“The Record DFA 127 fits seamlessly into the decor of the building.

It’s reliability, quiet operation and easy installation along with the service and support from Record made the process run very smoothly.”

Phil Haigh
Estimating Director
RB Architectural Hardware

The DFA 127 is a universally applicable automatic swing door operator which is robust and versatile to suit most applications.

Silent in operation, the DFA 127 is suitable for receptions and office environments.

The DFA 127 automates new and existing doors quickly & economically to save on time and installation costs.
