

Wetherby Town Hall

Brief

To install an automatic sliding door in the foyer of Wetherby Town Hall to ensure quick and easy access for all.

Solution

As the entrance is very narrow the use of a sliding door was not possible. Instead Aaron Access chose a Record FTA 20 Folding Door. With door leaves that fold inwards, this automatic bi-folding door negates the need for added room around the entrance.

Result

An automatic solution that complements the architectural design of the building, is easy to operate and retains almost the full width of the entrance.

"The Record FTA 20 is a first class product and a great alternative to sliding doors. It arrived on time, was extremely easy to install and provided the ideal solution for Wetherby Town Hall"

Mark Talbot
Sales Director, Aaron Access

Reliable, robust space saving doors - ideal for entrances which exclude the use of sliding or swing doors.

Excellent in windy conditions

Easy to retrofit, saving time and installation costs
