i-record

Configuration Tool for Automatic Doors

i-record is a tried and tested configuration tool which offers a more comprehensive way to commission, service and maintain automatic doors, allowing users to configure parameters and sensors, update software and carry out error analysis and troubleshooting.
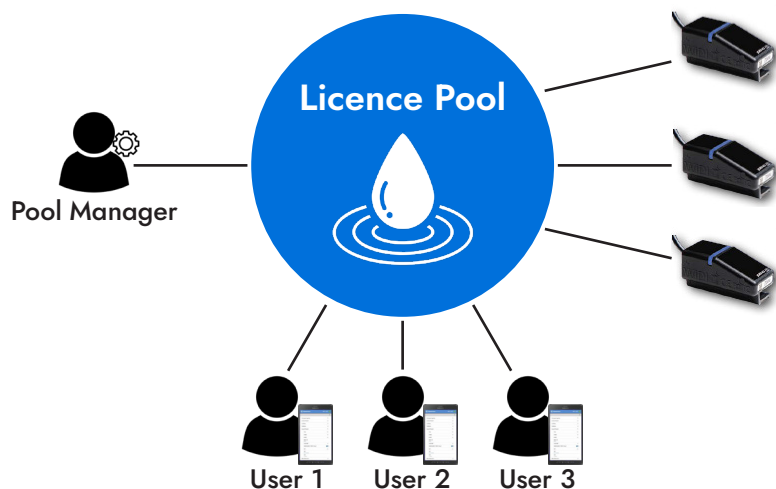

Key benefits

» Improved user interface

» Simplified updating of software

» Wireless

» Remote support

» Collection of door data & field experience

» New business model opportunities

Key features

» Full mobility thanks to wireless connection to the door controller

» System-based guidance through the configuration & commissioning process

» Extensive diagnostic functions & troubleshooting

» Automatic download of licences & software updates

» Remote support & access

i-record

Bluetooth Dongle WiDI & Licences

Licence Pool

Pool Manager

User 1   User 2   User 3

Fees

» Monthly per WiDI
(In addition to one-off purchase price)
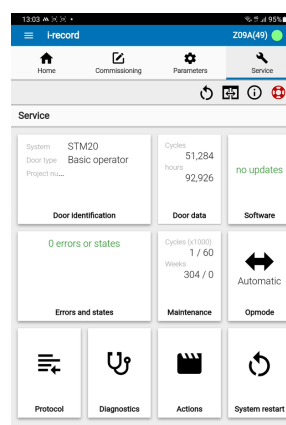

» Monthly cost per user

Security First

The registration of users and WiDIs with an administrated licence pool, with customisable user roles and licence checking protects against unauthorised access to the automatic door.

» Login with email and password used on Record website

» Users can share WiDIs belonging to the same licence pool

» Assign a license for each combination of user and WiDI

» Credit of 50 door accesses after initial installation (to enable offline usage)

» Renewal of licences/door accesses when connected to the Record server

*Parameter screen with visualised detection field in the Sensor Settings section.

*Service screen with information for analysis & functions
